← PAUL BUNYAN

Dear Glad Friend:

We are glad to send you our 1957 Catalog. The past season was favorable for the growing of exhibition spikes as moisture was ample during the blooming season and temperatures were on the cool side. This made it possible for us to exhibit specimen spikes at the Central International and several other shows. Our baskets and vases attracted a great deal of attention and much favorable comment.

Fall weather was on the dry side so digging conditions were ideal, enabling us to harvest our crop in fine condition. Our bulb crop is of excellent quality. We feel sure that our stock will give our customers the best possible results.

You will find listed the most outstanding exhibition and commercial varieties in the various price ranges.

We sincerely thank all of our customers for their business in past years and hope we will have the pleasure of again serving you. If you have never ordered from us may we suggest a trial order. We have received many testimonials on the satisfactory performance of our bulbs and firmly believe they will satisfy the most critical buyer.

### **KEY TO VARIETY LIST**

Size and color are indicated by the code number. The first figure indicates a size group, while the last two digits give the color class. Name of originator follows the variety name. Next follows the year the variety was first available to American purchasers, and after that, for many of the varieties will be found in parenthesis the number of growing days required from planting to date of blooming. The number of days to bloom is usually figured for large bulbs; medium size bulbs usually require from 5 to 7 days longer to bloom. Because of variations in climate, the number of days required for a particular variety to bloom may vary by several days. However, the listed blooming dates will give a fair approximation of what to expect of a variety.

### **BUSINESS TERMS**

Prices are for Cash with Order or 25% Deposit to hold an order, balance before shipment or C. O. D.

All quotations are subject to prior sale.

Orders are filled with clean healthy stock, true to name and up to size. However, if error should occur, we will endeavor to make satisfactory adjustment either by replacement of stock or refund of the purchase price.

Shipment can be made either by Parcel Post or Express. If your order consists of both prepaid and F. O. B. items we will ship the entire order Express Collect and add extra bulbs to offset the shipping charges on the prepaid items.

Substitution: We do not substitute variety without permission. If out of size ordered we will substitute with next size larger or smaller to the amount of money sent. If you do not want us to substitute size, please advise.

## PAUL BUNYAN (542)

1955 Introduction

A HUGE SALMON PINK with deep rose throat markings. The heavily ruffled and fluted florets are of very heavy texture, with good placement and firm attachment.

Opens 8 to 10 very large blooms often attaining 7" in diameter. It has a very long flowerhead of 22 or more buds most of which are in color.

Paul Bunyan grows to a height of 60". The plant is very vigorous with deep green foliage and makes healthy bulbs. Bulblet production and germination are both good. Blooms in 85 days.

Paul Bunyan will be a real contender on the show table. Picture a spike with 8 to 10 perfectly placed 7" florets open and 10 or more buds in color on a long flowerhead, and you have not only a first place winner in its class, but also an excellent chance to win Grand Champion, Largest Spike in the Show, Largest Floret, Longest Flowerhead, etc.

Commercial growers who have need for a very large pink cut flower will find Paul Bunyan a profitable glad to grow as its growing habits, color and opening qualities are up to commercial standards.

## FORTUNE (422)

(1954 Introduction)

BRILLIANT orange shading to a golden throat. A very bright and glowing color that is outstanding in the orange class.

Opens 6 to 8 5" florets on a well balanced spike of 20 buds.

The well attached blooms are nicely spaced on a stretchy flowerhead of 26". Tall grower attaining a field height of 58".

Blooms in approximately 80 days.

Fortune is a strong and healthy grower that consistently produces tall, well proportioned spikes even from small bulbs. Propagation is excellent. Bulblets are above average in size and germinate easily and make strong growth. It produces high crowned bulbs of fine appearance and very resistant to disease.

We have received excellent reports on the performance of Fortune in various parts of the U. S. and Canada. Its bright color and good growing habits including the ability to withstand heat make it the leading commercial orange glad.

## CELESTIAL ROSE (540)

1954 Introduction

GLISTENING clear light rose pink blending to a white throat. A very beautiful color.

Opens 8 5" blooms with 6 buds in color on a 21 bud spike. Florets are beautifully formed and nicely ruffled. Attachment is very good and the formal placement is all that could be desired.

Flowerhead 27", height 58".

Blooms in 85 days.

This variety makes high crowned and healthy bulbs. Propagation and germination are both good. Celestial Rose is an easy grower that consistently produces good spikes. Neither the floret nor the calyx is subject to burn even in extremely hot weather. Should be tops as a commercial cut flower and a fine show glad as well.

## MOTHER ANNE (466)

1954 Introduction

MEDIUM rose - lavender blending to a small cream throat. The  $4\frac{3}{4}$ " florets are rather deep and nicely ruffled. Informal placement. Opens 7 to 8 on a well balanced spike of 21 buds. Six additional buds in color. Flowerhead 28", height 56", blooms in about 75 days.

Mother Anne has a distinctive color that holds up well as florets open up the spike. Attachment, placement and spacing are all that could be desired.

This variety has the qualities to make a successful commercial cut flower. Makes healthy plants and bulbs and is a good propagator.

## RED RADIANCE (450)

1953 Introduction

**RED RADIANCE** is a very bright and clear light red without markings of any kind, a shade of red that the florist can use in quantity. Opens 8 to 10 5½" florets of heavy substance and perfect placement on tall sturdy spikes of 20 or more buds, 6 buds in color. Spacing and attachment are ideal and spikes are of good proportion. It makes fine bulbs and plenty of bulblets that germinate easily. Red Radiance makes tall, straight spikes which consistently grow up to 5 feet. The plants are wide leaved and of medium height, making it possible to cut long stems and save most of the plant for bulb growth.

The plants of Red Radiance are very wide at the base and the spikes stand up well in rain and wind when many others go down, this being of great importance to commercial growers.

Reports from all over the United States and Canada confirm our own experience that Red Radiance is the best red commercial glad. If you are a cut flower grower you cannot afford to be without Red Radiance.

## MARGERY (462)

1953 Introduction

**MARGERY**—A very early large flowered variety (blooms in 70 days), is a brilliant cerise rose with a deeper rose throat. Many of our customers and visitors call it an American beauty rose.

Its color has a sparkle and luster that must be seen to be appreciated. Margery easily opens 8 or more slightly ruffled 5" florets, with very good placement and firm attachment and most of the remaining buds showing color.

Under ordinary field culture the spikes will average 21 buds with a 26" flowerhead and a field height of 58". Foliage is deep green and of medium height making the tall spikes easy to cut. Margery produces high crowned and healthy bulbs. Bulblets are of average size and germinate easily. Propagation is good.

For the past several years Margery was the first large flowered variety to bloom. Because of its earliness, very fine color and dependability Margery will be a profitable variety for the commercial grower.

# NEW FOR 1957

From DAVID M. PUERNER, Milwaukee, Wis. (Introducer's description)

**BEAUTY ROSE (462)** Beauty Rose is a classy medium rose pink, slightly ruffled with a heavy midrib of deep rose. It opens 8 florets easily with 6 more in color, carrying 20 to 22 buds on tall strong spikes. It is healthy and a good propagator and germinator. Beauty Rose is a sport of King David and has all the fine qualities of its parent, retaining all the characteristics except that florets do not flare out as much to give it 500 size. It is especially appealing indoors under artificial lighting. No reverts in 4 years growing.

**Priced:** L \$2.00; M \$1.50; S \$1.00. Bulblets 10 for \$1.50, 100 for \$10.00
